WORK EXPERIENCE

Frontend Engineer

smallcase Technologies Private Limited

12/2019 - Present

Smallcase: Invest in pre-made stock portfolios with smart weightings. Easy and simple.

Achievements

- Worked briefly on Broker Platform, contributing to translating pixel-perfect designs into code.
- Developed 'Smallboard', an internal tool that became widely popular across the company and the primary choice for product back support.
- In smallboard, Oversaw project planning, resource management, and timeline adherence while prioritizing team needs and delivering efficient solutions and multiple features.
- Managed the entire project's multiple releases from scoping to maintenance!
- Devised and implemented a highly sophisticated Identity and Access Management (IAM) system for Smallboard, showcasing exceptional architectural and development prowess.
- Accomplished transition from a monolithic repository to independent repositories, while seamlessly preserving the commit history.

UI Developer

Evide Health Software Analytics

07/2017 - 12/2019

MyEvide is a Personalised, secure healthcare solution promoting healthier lives.

Achievements

- Proficiently developed web applications using React and JQuery emphasizing optimised, clean code and test-driven development techniques.
- Independently designed and developed UI for multiple internal projects from conception to completion.
- Designed and implemented UI with Python Flask library integrations,

PROJECTS

Lost and Found (Hobby/Side Project) [↗](#)

- Developed Node.js server and ReactJS-based frontend from the ground up.
- Effectively integrated JWT for secure authentication, along with Auth0 for social login, and MongoDB for efficient data storage.
- Implemented CI/CD using CircleCI and Heroku, ensuring continuous integration and deployment for efficient delivery.
